KAMBIODEX

brand guidelines · version 2.0 · october 2026

Brand kit KAMBIODEX

How to use the KAMBIODEX logo, symbol, colors, typefaces and icons on the website, on social media and on listing sites.

for internal and partner use

01 · logo

The logo

The logo combines the **symbol** (two crossed swap arrows, navy and gold, with a rising gold line as underline) and the **KAMBIODEX** wordmark, with “DEX” in gold. Always write the name as one word, in capitals.

primary · light backgrounds

dark backgrounds

one color · black

one color · white

When to use each version

- **Primary:** whenever possible, on light backgrounds.
- **Dark background:** in the site’s dark theme, on banners and dark photos.
- **One color:** when color is not available, such as stamps, engravings and black-and-white documents.

02 · symbol

The symbol

The crossed arrows stand for swapping between tokens; the gold line under the name stands for the market going up. The symbol can be used alone when space is tight: browser icon, app icon, profile picture and listings.

primary

dark background

one color · white

Clear space

Keep a clear area of at least **half the width of the symbol** around the logo and the symbol. No text, image or border may enter this area.

Minimum size

asset	screen	print
Horizontal logo	100 px wide	25 mm wide
Symbol	24 px	8 mm

App icons

App icons and profile pictures use the **silver symbol on a navy square**. Platforms that round icons automatically (iPhone, Android, social networks) may do so.

Colors

A few colors, used with discipline: navy conveys trust, gold marks what matters.

Navy
`hex #10233f · rgb 16 35 63`
Primary color: app icon background, buttons and headers.

Ink
`hex #0e1a2b · rgb 14 26 43`
Body text and the wordmark on the primary logo.

Gold
`hex #d9b26a · rgb 217 178 106`
Accent on dark backgrounds and the gold parts of the symbol.

Dark gold
`hex #8a6417 · rgb 138 100 23`
Accent on light backgrounds (“DEX”, key figures).

Ice
`hex #f3f5f8 · rgb 243 245 248`
Page background in the light theme.

Night
`hex #0a111c · rgb 10 17 28`
Page background in the dark theme.

Support colors (interface only)

- Green `#1e7a4b` for gains and “in range”; red `#b3261e` for losses and errors; light orange `#fdf1e4` for warnings.

Typefaces

Three free, open-license families (SIL Open Font License), available on Google Fonts.

instrument sans · bold e regular

KAMBIODEX

Wordmark, buttons, menus and interface text.

Large page headings and marketing materials.

jetbrains mono · regular

$1,234,567.89 · 0.30%

Amounts, prices, fees and wallet addresses, with aligned digits.

05 · misuse

What not to do

do not stretch or squash

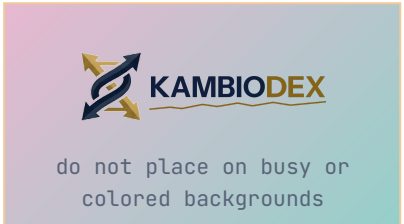

do not change the colors

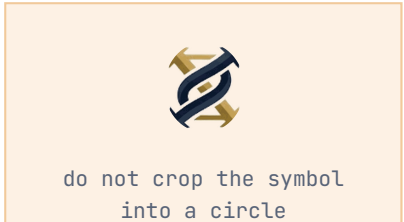

do not rotate

do not add shadows or effects

do not place on busy or colored backgrounds

do not crop the symbol into a circle

Brand name

- Always write **KAMBIODEX**: one word, all capitals. Not “KambioDex”, “Kambio DEX” or “Kambio-Dex”.
- The name is never translated: it is KAMBIODEX in every language.

Icons and kit files

folder / file	use
logo/ (svg and png)	Horizontal logo in 4 versions and symbol in 4 versions. PNGs have transparent backgrounds. (The SVG files wrap the PNG until a vector original of the logo is available.)
icons/favicon.ico, favicon.svg, favicon-16/32/48.png	Browser tab icon.
icons/apple-touch-icon.png (180)	iPhone home screen shortcut.
icons/icon-192, icon-512, icon-maskable-512	Android shortcut and web app (site.webmanifest included).
social/avatar-400 and avatar-1000	Profile picture on X, Telegram, Instagram and Discord (works with round crops).
social/x-banner-1500x500	X profile header.
social/og-image-1200x630	Image shown when the site link is shared.
listing/icon.svg, icon-256, icon-512, icon-256-circle	Listings on CoinGecko, DEX Screener, GeckoTerminal, aggregators and token lists.

Interface icons

For icons inside the site (gear, arrows, moon and sun, wallet), use a single thin-line, open-license library such as **Lucide**, with stroke width 2 and rounded line caps, matching the symbol.
